### **Little You Launches Partnership Program For Artists, Organizations, and Schools to Expand Their Reach**

Toronto, Canada, 02/28/2022 –

Little You is a creative effort that recreates imagination for young children by providing a platform for youth to create their one-of-a-kind design of anime figures using 3D printing technology. Children can create and customize miniature characters' appearances and identities on the website using this platform. Imaginations can run wild on Little You as children can change colors and sizes for add-on accessories making this an entire experience for them.

The best part of all is that after they have created their fun 3D animations, Little You will then bring the model to life using 3D printing technology. Once printed, the creation will be shipped to the child and they can see their creation right in front of them! The website is free to sign up for, offers worldwide delivery, features instructions manuals to help children learn the website, and includes over 800 design templates. More than 500 kids have created 600+ figures using Little You's website and technology.

Little You even offers a rewards program that allows users to earn points through interactions with the website. For example, if anyone likes your creation, you'll earn a point. If you share your creation in a gallery, you'll earn 5 points. Every user will earn 20 points for a first-time sign-up, and if anyone purchases your creation, you'll earn 50 points! For every 1,000 points, you can receive \$10 off of your purchase.

Recently, Little You launched a partnership program to help artists, organizations, and schools to benefit from the distribution, marketing, and innovative products offered by Little You. With the ability to take advantage of brand exposure, revenue sharing, and creative support, partnering with Little You can help artists and organizations take their business to the next level and reach a global audience to drive meaningful results.

Little You is offering an Artist Collaboration Opportunity for a limited time. One for fashion designers, photographers, and influencers, another for organizations, and one for school programs. The first partnership option is for designers and influencers where they can create their own character and engage with fans for a customized experience.

Interested parties can purchase this partnership for \$399 (a \$690 value!) and it includes a 3D model design, artist interview, blog post, social media blast, graphic ad, sample print, forums submission, and backlinks. With this partnership, you'll be able to design your own character and we'll take care of all the great marketing details to get your brand out there to the audience you desire. It's a perfect partnership to build something awesome together. Take this as an opportunity to get your designs and passions out into the world. This Artist Collaboration Opportunity will only be available for a limited number of individuals, so don't miss out on your chance!

There are also collaboration opportunities for businesses and schools through this program that include different price points and collaboration benefits. The business option comes with custom pricing, banner ads, blog posts, creative service, 3D printing service, newsletter, custom miniature model, bulk discount, and white labeling. For schools, the starter package for this partnership begins at \$999 and includes several benefits, such as: a press release, 10 3D printed toys, event submission, Eventbrite post, social media blast, graphic ad, and 1-month banner. Both opportunities present the chance for your organization to take advantage of our marketing, planning, and 3D printing skills.

Beyond the individual benefits, Little You is a popular avatar-making app that connects people with their friends around the world. Partnering with Little You would enable you to reach a global audience and drive noteworthy results for your brand or organization. This is only a limited-time opportunity with a limited number of partnership spaces available, so make sure to apply today. To apply for the opportunity, [click here](#).

#### **About Little You**

Little You is a web platform that allows children to a one-of-a-kind design using 3D printing. Redefining imagination for young children is the core of this company. The best part of this platform is that children can create and make custom miniature 3D characters' appearances and identities. This includes selecting and trying different costumes and accessories. Little You has recently expanded to artist partnerships on the website to increase offerings on the platform.
